This will be achieved by the high-velocity impact of abrasive material against the surface in accordance with the relevant codal provision, which will also create a base for good adhesion. The abrasive material once used for cleaning a heavily contaminated surface cannot be reused re-screened. The material specifications and other requirements shall be as provided in the Indian Railways Bridge Manual, 1998 or its latest version or any other IS codal provision.

The metal coating shall be checked for thickness by an approved magnetic thickness measuring gauge. At least one reading for each sqm of the area painted shall be taken. The calibration of the gauge shall be checked against a standard of similar thickness with an accuracy of 10%.
- (g) For the measurement of dry film thickness, the following instruments may be used by the contractor. Dry film thickness is to be measured as described in Appendix-VII of IRS B1-2001.
